

At my desk

The Rappt.io website is the control centre for your project(s). From adding single records to bulk adding thousands, managing project members, creating advanced lines, powerful reporting and much more.

Common tasks when starting out are:

- [Creating a project](#)
- [Adding my first installation](#) (generally easier on the [rappt.io app](#))
- [Recording my catch records](#) (generally easier on the [rappt.io app](#))
- [Running reports](#)
- [Adding members](#)

The website is a powerful tool with many features, all covered in the [Rappt.IO Comprehensive User Guide](#)
