

Bird count records

<https://www.youtube.com/embed/j9Bx5QxmBKA>

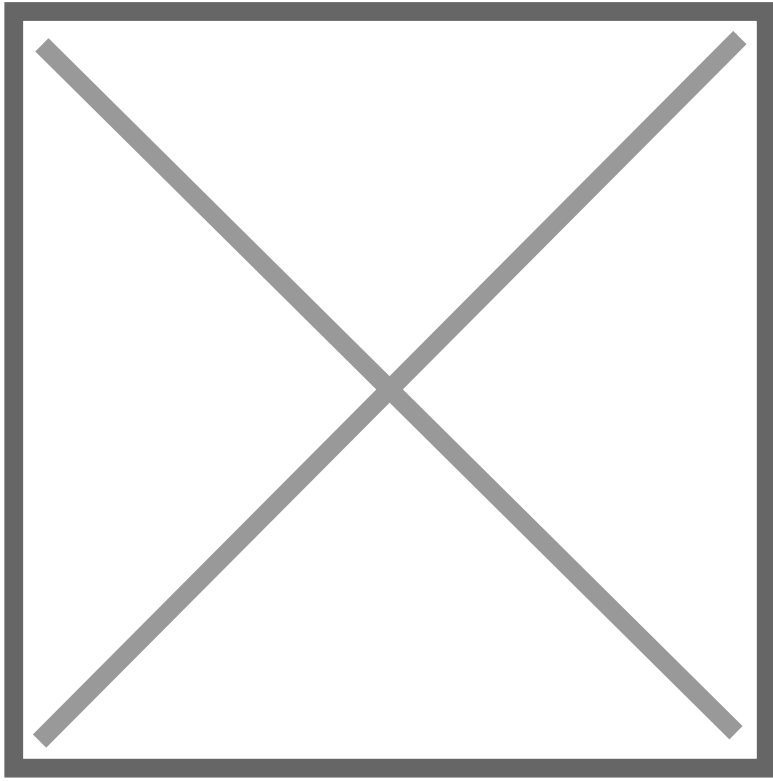

Settings

Tap the cog icon  to set the type of observations (seen, or seen and heard) and to add historical records.

Species

Tap the bird icon  to select species to observe from the list. You need to select at least one species to start.

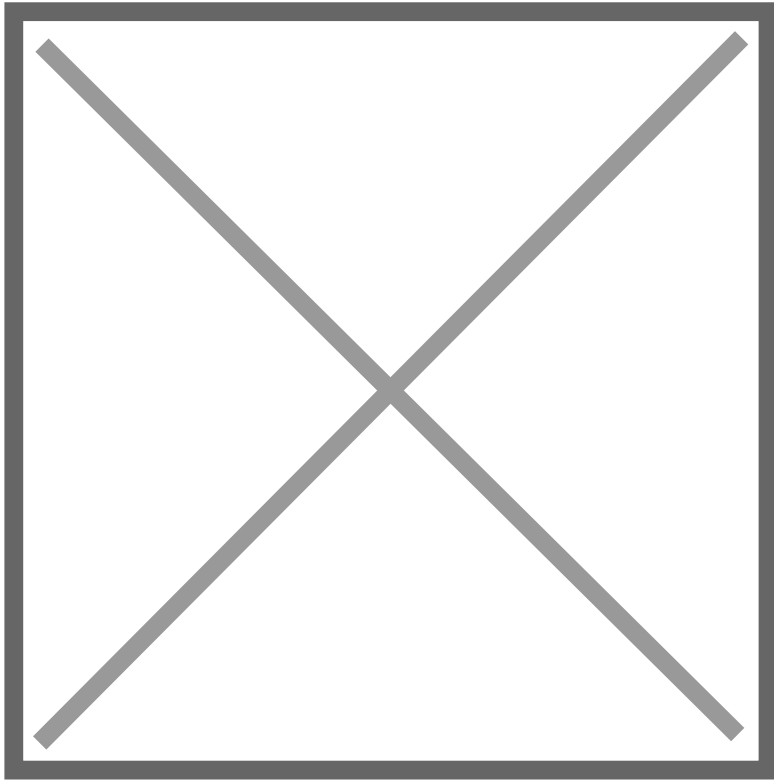

Observation types

Select whether your observations are only for birds you have Seen or whether you want to include ones you've only Heard as well.

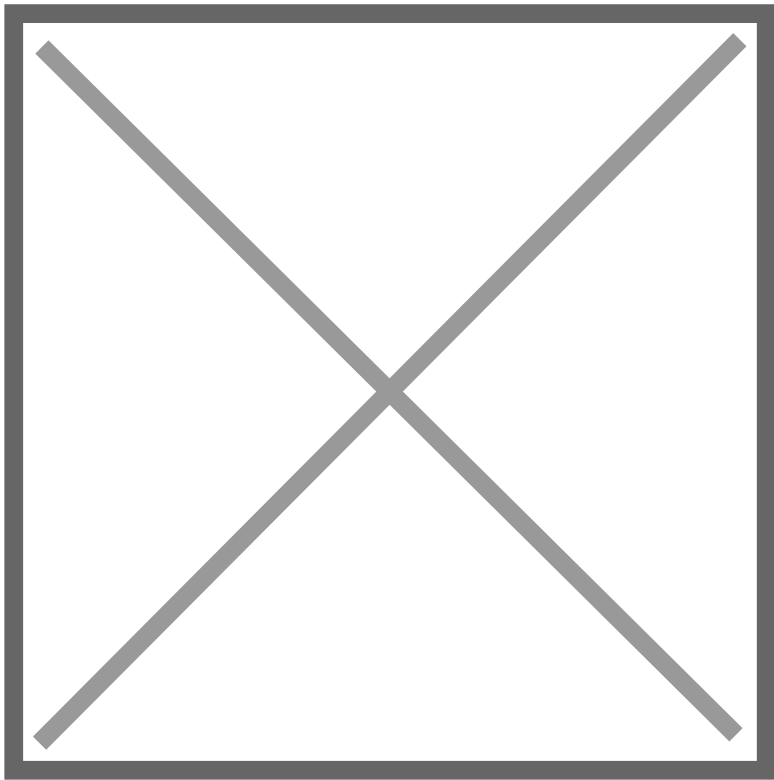

Add historical bird count

Allows you to add observations without running the timer.

Start

Tap the Start button  to start the timer and record observations

Pause

Tapping the Pause button  allows you to

temporarily pause the timer countdown so that you

can add new species or change your settings.

Stop

Tapping the Stop button  cancels the count, removes all counts made in the current session and resets the timer.

Seen

Tapping the Seen icon  increases adds a Seen observation and increases the observation counter for that species. To remove a count, press and hold until the number decrements.

Heard

Tapping the Heard icon  adds a Heard observation and increases the observation counter for that species. To remove a count, press and hold until the number decrements.
