

Changing the trap condition to disabled

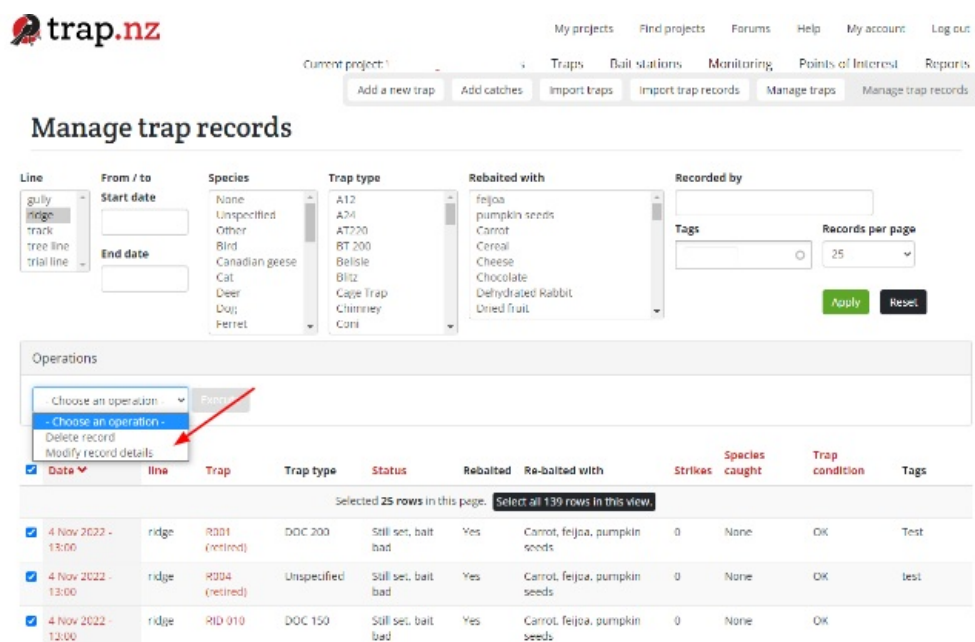

For traps that require an open or closed status Rappt.IO has created the disabled condition.

1. Open your project trap page and select **Manage trap records**

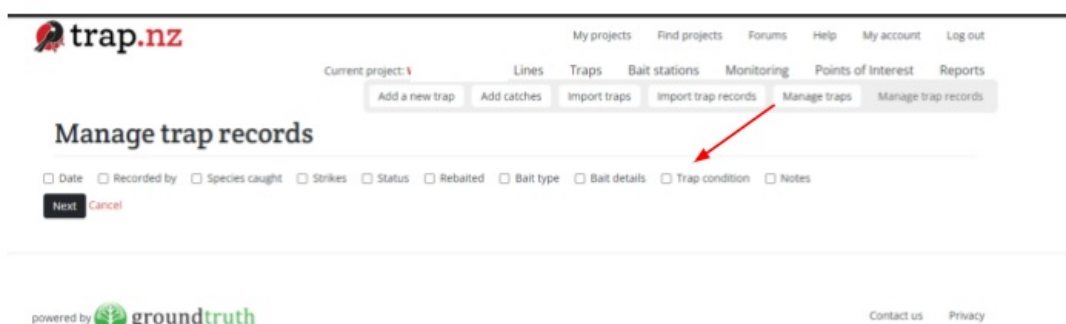

2. Select the trap lines you want to disable and select apply

3. Select the traps you want to disable and select the operation modify records - execute

4. Tick the box "trap condition"

5. This will open up a drop-down box where you can choose disabled

Manage trap records

☐ Date
 ☐ Recorded by
 ☐ Species caught
 ☐ Strikes
 ☐ Status
 ☐ Rebaited
 ☐ Bait type
 ☐ Bait details
 ☒ Trap condition
 ☐ Notes

Trap condition

OK

OK

Needs maintenance

Repaired

Regassed

Refured

Battery charge

Disabled

6. To reset all the traps repeat the steps above and select ok
