# Setting defaults using Manual complete

Adding default settings

- Setting default settings in your Rappt.IO App is an easy process that can save you time out in the field.
- This is helpful when you have a lot of installations to check and update.
- There are two ways in which you can set defaults on the Rappt.IO App, either "manual complete or "walk line"

Manual complete

How to add defaults settings using manual complete

Select a line from your Rappt.IO App, in this case, I have two lines I will select ridge
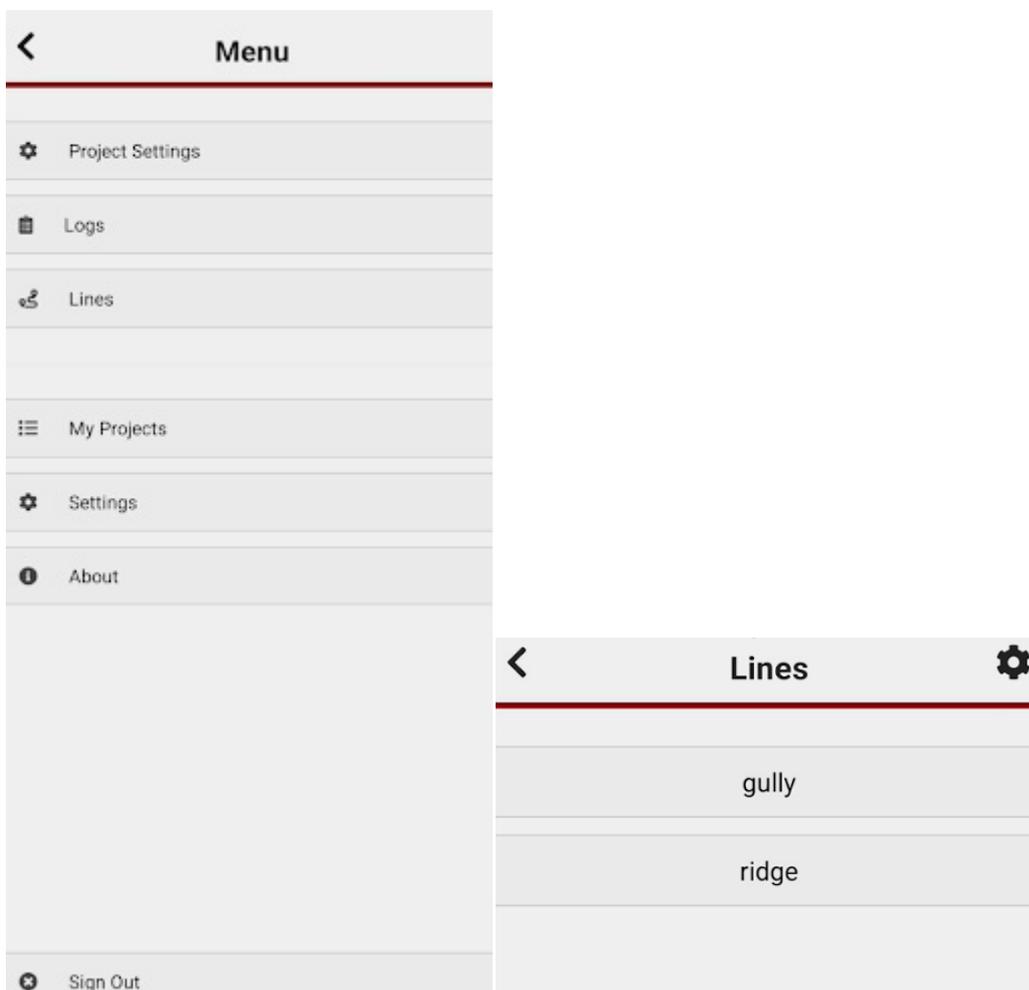

This will open all the installations on this line

Direction	Line Notes	Manual Complete	Walk Line

As you work your way through the installations on your project the Rappt.IO App will automatically move to the next installation on your line. This will display by both the trap number and An indicator bar at the top of the screen that shows your progress through the line (green checked, black un-checked, red never-checked / new trap).

When you have finished Checking your installations select close to finish your manual complete.
