

Unretiring a retired installation

There could be many reasons you would want to unretire an installation, a member may have accidentally retired it in the field, you may have retired it for a season, or you may have retired it then realised an installation was still needed in that site.

The instructions for unretiring an installation are the same but for this example, we have used traps

1. On your project page select [manage traps](#)
2. A pop-down option of retired or active will become available. Select retired and apply the filter, this will then show all the traps that have been retired.

Manage traps

Note: traps with records attached cannot be deleted. In this case, either Retire the trap instead, or delete the records first.

Active/Retired: Retired Title: Line: - Any - Type: - Any - Sub type: Installed (from / to): Tags: [Apply filter](#)
 Contains... [Reset](#)

Operations

- Choose an operation - [Execute](#)

<input type="checkbox"/>	Number/Code	Type	Line	Date installed	Installed by	Tags	Last Record	Assigned members
<input type="checkbox"/>	CT09 (retired)	DOC 250		27 Aug 2019	Scott		2022-06-03	2 member(s) assigned
<input type="checkbox"/>	T101	DOC 200		4 May 2021			2021-07-01	
<input type="checkbox"/>	T106 (retired)	DOC 200		4 May 2021			2021-05-04	
<input type="checkbox"/>	trap1 (retired)	DOC 200	Central circuit	8 Oct 2021	daniel			
<input type="checkbox"/>	to	AT220		7 Apr 2022	daniel			

Note: traps with records attached cannot be deleted. In this case, either Retire the trap instead, or delete the records first.

3. Select the traps you are wanting to unretire, then choose operation - change trap details, press execute.
