

Using Contractor mode

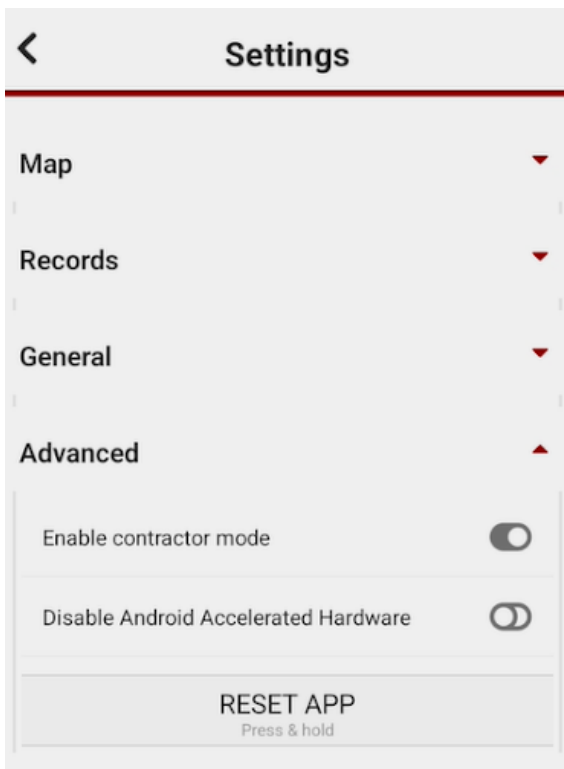

Contractor mode allows you to add property owners' details into an installation's details.

This will help anyone entering another person's property to easily be able to contact them and advise them of the visit.

1. To enable contractor mode select settings on your Rappt.IO menu page

2. Select advanced and enable contractor mode

3. Reset App and hold. Now when you are ready to create a new installation select the green tick.

4. Select the installation type

The screenshot shows a mobile application interface titled "Add Installation". It features a list of four installation types: "Bait Station", "Trap", "Monitoring Site", and "Point of Interest". The "Trap" option is currently selected, indicated by a mouse cursor pointing at it.

5. You now have a new contact section in your installation details menu

The screenshot displays the "New Trap" form in a mobile application. The form includes the following fields and options:

- Code ***: A text input field.
- Type ***: A dropdown menu currently showing "Select".
- Description**: A text input field.
- Trap line**: A dropdown menu currently showing "Select".
- Has sensor?**: A checkbox that is currently unchecked.
- Notes**: A text input field.
- Contact**: A new section added to the form, featuring a camera icon for uploading a photo.

At the bottom of the form, there are two buttons: "SAVE" (with the subtext "Press & hold") and "CANCEL".

6. This opens up to allow you to record property owners' details
